[\[PDF\] The computer for the 21st century](#)

M Weiser - Scientific American, 1995 - [wiki.daimi.au.dk](#)

... UBIQUITOUS COMPUTING begins to emerge in the form of live boards that **replace** chalkboards as well as in ... aug- ment main **memory** capacity: conserva- tive extrapolation of current technology suggests that **removable** hard disks (or nonvolatile **memory chips**) the size ...

[Adapter and a removable slide-in cartridge for an information storage system](#)

JC Darden, MM Praca, PJ Tomasi - US Patent 4,941,841, 1990 - Google Patents

... to be understood that the scope of this invention includes the application of a **removable** cartridge with ... the user to pull on the two hooks with his index fingers to remove and insert ... the housing 6 which houses the central processing unit, the disk drives, RAM **memory chips** and all ...

[Memory on the move](#)

RM Sherwin - IEEE Spectrum, 2001 - [ieeexplore.ieee.org](#)

... all the flash types are some vari- ety of electrically erasable programmable ROM (EEPROM) **chip** that maintains ... The **memory** cells are laid out in a grid of rows and columns, addressable by bit ... Data is writ- ten by using a process called tunneling to add or remove charge from the ...

[Flash memory goes mainstream](#)

B Dipert, L Hebert - IEEE spectrum, 1993 - [ieeexplore.ieee.org](#)

... Write operations to an EEPROM cell store or remove electrons from areas of the cell ... This added cell complexity, along with on-**chip** high-voltage generation and considerable peripheral logic ... density and in- creases cost per megabyte compared to other types of **memory storage**. ...
